Dear Tina,

It is my concerned that US' Senate shall ratify CRPD with any reservations, understandings and declarations . As a pioner country for human rights issues in the world the US should not do that! All the content of CRPD actually already mentioned in many parts of your country laws. So what is it burdent to your country?

Dear Tina, my country Indonesia which is a country that most of US senate members still hold view as a left behind in human rights area already ratified the CRPD without RUDs. It was took time just short time in parlement proses.

Regards

Eva Kasim

Activist disability movement in Indosia and also a government official who was part of drafter academic text for ratification of CRPD in Indonesia
