

## **Southern Ridge Estates**

### **Promoting a healthy summer**

#### **Patio containers:**

- Tomato plants
- Pepper plants
- Bush cucumber
- Flowers for a splash of color

#### **Pavilion garden:**

- Tomato
- Watermelon
- Cantaloupe
- Squash
- Bush snap beans

The Pavilion garden will be open to all residents at Southern Ridge. We will use the honor system on maintaining the garden, each resident should do their part in helping the garden grow and produce if they want to reap the rewards. We have established this garden to help residents cut cost by growing some of the basic produce needs and promote a healthy diet.

We have provided the basic needs to help the garden such as:

- Watering cans
- Cart
- Buckets
- Basic garden tools

Unfortunately, we are unable to connect a water hose to this area at this time, however the outside water is on at building P or you can bring water from your own home to water the plants.

As produce is ready and if you have helped in the garden growth, please help yourself to the proceeds for your personal needs. I know some residents will not be able to participate, and if you know of a resident that is homebound at Southern Ridge it will be fine to deliver a few items to them as well.

Each month please let us know how much produce that you have taken from the garden. Fill out the attached slip and just send it in with your rental payment each month. This will help us keep track of how productive the garden is and if any changes will need to be made in the future.

I will be checking the garden weekly for progress and at the end of the summer we will meet again to see if this program was successful for the residents at Southern Ridge.
